Preface . . . . .	7
List of the abbreviations . . . . .	11
Summary . . . . .	15
 <b>Part 1 – Somatic development and evaluation of physical fitness – research results (I. Rutkowska, A. Kosmol) . . . . .</b> 17	
1. Introduction . . . . .	21
1.1. Specificity of motor and somatic development and reasons for developmental delay of the blind children . . . . .	25
1.2. Theoretical background and research results on physical fitness of the blind persons . . . . .	39
2. Objectives, hypothesis and research questions . . . . .	57
3. Research methods and material . . . . .	59
3.1. Methods of physical fitness assessment . . . . .	61
3.2. Statistical methods . . . . .	64
4. Research results . . . . .	66
4.1. The evaluation of changes in selected anthropometric characteristics of the blind persons aged 7-16 years (morphological component) compared to the population of able-bodied peers. . . . .	66
4.1.1. The body height . . . . .	66
4.1.2. The body mass . . . . .	75
4.1.3. The ponderal index . . . . .	79
4.1.4. The percentage of body fat . . . . .	83
4.2. The evaluation of changes in physical fitness of the blind persons aged 7-16 years (musculoskeletal and cardio-respiratory components, speed abilities) compared to the population of able-bodied peers . . . . .	84
4.2.1. Results of the hand grip strength test . . . . .	84

---

4.2.2. Results of the sit-ups test . . . . .	90
4.2.3. Results of the seat and reach test . . . . .	92
4.2.4. Results of the standing long jump test . . . . .	93
4.2.5. Results of the Cooper Test (cardio-respiratory components) . . . . .	98
4.2.6. Results of the 50 m run test . . . . .	99
4.3. Relationships between selected anthropometric characteristics and physical fitness of the blind children. . . . .	101
5. Frames of reference (percentile charts) to evaluate of physical fitness of the blind persons aged 7-16 years (I. Rutkowska, K. Milde, A. Kosmol) . . . . .	108
6. Discussion and summary . . . . .	114
7. Conclusions . . . . .	145
<b>Part 2 – Adapted physical activity (adapted physical education, recreation, sport) – implementation of findings (A. Kosmol, I. Rutkowska) . . . . .</b>	<b>147</b>
8. Influence of sport activities on motor abilities of the blind people . . . . .	149
8.1. Specificity of selected sport disciplines (history, rules, teaching methodology) . . . . .	158
8.1.1. Goalball (I. Rutkowska, T. Koc) . . . . .	158
8.1.2. Judo (A. Królikowska, A. Kosmol) . . . . .	180
8.1.3. Tandem Cycling (L. Kosiura, A. Kosmol) . . . . .	196
8.1.4. Athletics (I. Rutkowska) . . . . .	211
8.1.5. Alpine and Nordic Skiing (I. Rutkowska) . . . . .	237
8.1.6. Futsal (I. Rutkowska) . . . . .	250
8.1.7. Swimming (A. Kosmol, M. Nowicki) . . . . .	254
9. References . . . . .	277
10. Appendix . . . . .	289
